Channelcategories

> ⓐ **This article is designated for administrators.**

When you create a channel, you can associate it to a <u>gallery</u> (aka a category). When users navigate to a gallery page, they will be able to browse the media and also the channels associated with that gallery. This module must be enabled to allow users to associate channels to galleries / categories and replaces the ChannelTopics module.

Configure

1. Go to your configuration management page, and navigate to the **Channelcategories** module. Your link should look like this: https://{your_KMS_URL}/admin/config/tab/Channelcategories.

2. In the Channelcategories page, configure the following:

- **enabled** - Set to 'Yes' to enable the channelcategories module.
- **channelCategoriesProfileId** - Enter the profile id of the Channel Categories metadata profile.

3. Click **Save**.

After enabling this module, a new section will appear on the Channel Edit page which will allow you to associate that channel to categories.
