

MediaSpace gap analysis moving to Theming

The Theming Feature Set is currently in a limited features release mode. The following features are not available on the Theming-based pages at the moment:

- **MediaSpace video portal channels:**

- Channel moderation
- Search in channel
- Add media to a channel
- Remove media from a channel
- Channel theme feature tab (note that a different feature set is available)
- Channel tags on the header
- Action buttons (for example, edit and analytics) and media details (for example, entry owner and number of likes) that appear on the media thumbnail (as shown below).

- **Media view page:**

- "Add to" functions (except for the main media upload function under the '+Create' button which is Theming-based).
- Option to add collaborators (co-editors, co-publishers, and co-viewers) in the upload media form.
- Media styling to support removal of elements on the page.

To learn more about Theming, check out our article [Video Portal Theming Feature Set](#).

You can also keep up to date on everything new and improved in MediaSpace video portal and KAF by reading our [Release notes](#).
