

Enable media download

 This article is designated for all users.

 The `downloadmedia` module must be enabled in the Video Portal admin page.

 You must be the media owner to enable this feature.

1. Navigate to the entry you want to enable and click on it.

A screenshot of a video entry page. On the left is a video player showing a white cat with a red bow. To the right of the video, the title 'Cat' is displayed in blue, followed by the text 'This is a template entry.' Below the title is a green 'Published' button. Underneath are two 'tag' buttons. At the bottom right, it says 'Owner • on September 27, 2023'. A red arrow points from the 'Cat' title to the video player.

2. In the entry page, click the **3 dots menu** and choose **Edit**.

A screenshot of the video entry page showing the 3 dots menu. The menu is open, displaying options: 'Add to playlist', 'Edit', 'Add to watch list', 'Analytics', 'Launch editor', and 'Delete'. A red arrow points from the '3 dots' icon to the 'Edit' option.

3. In the edit media page, click on the **Downloads** tab.

[Details](#) [Languages](#) [Publish](#) [Options](#) [Collaboration](#) [Thumbnails](#) [Presenters](#) **Downloads** [Captions](#)

4. Click one or more of the available formats in which you'd like users to be able to download (your administrator has already set the formats you can choose from).

Available Formats:

- Source
- Mobile (3GP)
- Basic/Small - WEB/MBL (H264/400)

5. Click **Save**.

A successful save notification displays:

The information was saved successfully
