

Search in My Media

This article is designated for all users.

Kaltura offers a powerful search function in the My Media section of your video portal, making it easy to locate items quickly. Once you learn how to do a basic search, you can learn how to use special search parameters, tools, and filters to get the most helpful results.

Access My Media

1. Log into your video portal and navigate to the user menu.
2. Select **My Media** from the user drop-down menu.

The My Media page displays. (To learn more about the **My Media** library, visit our article [My Media](#).)

Search in My Media

1. The search bar is prominently located at the top of the page. Type in keywords related to the media's title, description, or tags of the item you're searching for.

To search for an exact match, use quotation marks around the word or phrase, for example, "customer".

2. Press **Enter**. (If 'instant search' is enabled by your system administrator, results are automatically displayed as you enter characters, and there's no need to click Enter.) The results are displayed with your keyword(s) highlighted in yellow.
3. When you find the item you want, click its title or thumbnail to navigate to the entry.

Navigate the search results

The Search results provide essential details to help you select the correct item.

Title, description and media type

The media's title and description are next to the thumbnail, which also features a small icon indicating the media type. The example below shows a thumbnail with an image icon. No icon means it's a video.

Time and date

The time and date is displayed for Live, VOD, Kaltura Meetings, Simulive, and Webcast entries. The "Live" and "Schedule" indicators are displayed per the set scheduled time.

Show More

Click Show More to get more information about the media item, such as the owner, creation date, published categories, likes, views, and comments. (Click **Show Less** to collapse the results.)

Keywords

If the keywords you typed appear in metadata fields, they are displayed in the **Keyword found in** section.

Metadata

Each metadata is clickable, for example, clicking **2 Tags** will display up to 5 tags where the keywords are found. (Click again to close the displayed tags.)

The types of metadata displayed with initial click are as follows:

- **Tags** – displays 7 results
- **Details** – (custom fields other than the basic metadata) displays 10 results
- **Quiz** – (results from quiz Questions and Answers. - displays 5 results
- **Chapters, Slides, Comments, Captions** - displays 5 results

If more than 5 keywords are found in any of the metadata types, the **Show All** link is displayed. This might happen when searching for a word that appears many times in a captions file. Clicking Show All displays all the results found for this entry (as shown in the image below with the keyword "if"):

When the metadata type is time based, a number is displayed on the left, indicating the location of the keyword in the media's timeline. Clicking the time indicator takes you to the video's page, where the video starts playing from the time indicated.

Refine your search

You can further refine your search by using the filters and sort functions under the search bar.

Filters

The following **Filters (1)** are available when searching all of My Media. You don't have to select all of the options - just the ones you need to narrow your search. (If you have more than one page of filters, click **More Filters** at the bottom right of the section to open the next page):

- **Media type** – All Media / Video / Quiz / Audio / Document / Draft / Image / Webcast Events / Room / Interactive Video
- **Publish Status** – All Statuses / Private / Published / Pending / Rejected / Unlisted
- **Webcasts** – All webcasts / Live Webcasts / Upcoming Webcasts / Recorded Webcasts / Archived Webcasts
- **Scheduling** – All Availabilities / Future Scheduling / Available Now / Past Scheduling
- **Ownership** – Any Owner / Media I or My Group Own / Media My Group Owns / Media I Can Edit / Media I Can View / Media I Can Publish
- **Captions** - All / Available / Not Available
- **Duration** - 00:00-10:00 min / 10:00-30:00 min / 30:00-60:00 min / Custom
- **Creation Date** - Any Date / Last 7 Days / Last 30 Days / Custom
- **Last Update Date** - Any Date / Last 7 Days / Last 30 Days / Custom
- **Department Division** - Marketing / Product / Engineering / Finance / Sales / HR / Management
- **Free Text** - Department name (type in your text)

The basic filters depend on the page in which you are searching. Advanced filters may be enabled by your administrator in the [Search module](#).

You can apply multiple values for filtering (faceted search), for example, you can search through all video files and all audio files at the same time.

After applying your filters, they display below the filters button. Your search results will now appear with the filters you specified.

Search In

You can pinpoint the location of keywords in the search by using the **Search in** function (2). The following fields are available:

- | | |
|--|---|
| <ul style="list-style-type: none"> • All Fields • Details • Chapters/Slides • Captions | <ul style="list-style-type: none"> • Polls • Quiz • Comments |
|--|---|

Sort By

Use the **Sort By** filter (**3**) to sort results by the following:

<ul style="list-style-type: none"> • Relevance • Creation Date - Descending • Creation Date - Ascending • Update Date - Ascending • Update Date - Descending • Alphabetically - A-Z • Alphabetically - Z-A • Views • Plays • Likes 	<ul style="list-style-type: none"> • Webcast Start Date - Ascending • Webcast Start Date - Descending • Webcast End Date - Ascending • Webcast End Date - Descending 	<ul style="list-style-type: none"> • Scheduling Ascending • Scheduling Descending • Comments
--	--	---

Click the **x** to remove specific filters.

Click **Clear All** on the bottom right to remove all filters and sorting options.

Keywords & filters logic

Each filter is added as an AND to other filters, however, each value within each filter is added as an OR to same filters values. For example, when choosing the filters below, the logic is:

(Media Type = Video **OR** Quiz) **AND** (Ownership = Media I Own or My Group Owns **OR** Media I Can Edit) **AND** (Captions - Available)

When using keywords, results are returned based on scoring. Searching for *Keyword1* *Keyword2* will first show results that contain both keywords, and lower score results containing only one of the keywords, or partial results, lower on the results lists. When adding keywords, the filter logic will use "(Keywords) AND (filters)".
